Using the Course Cart

Did you know that you can save your classes before your scheduled enrollment date? By logging on to Campus Connection and using the Course Cart, all of the classes you're looking to take next quarter can be set aside. That way when your enrollment date does come around, registration is a breeze.

1. After you log in, click on For Students in the left menu panel. This will drop down another menu. Click on Records and Registration. On the second row, click Course Cart.

2009-2010 Autumn | Graduate | DePaul University

[See textbooks for Loop Campus Classes in the Course Cart](#)

[See Textbooks for Lincoln Park Classes in the Course Cart](#)

2. This is the Course Cart. From here, you have two options. You can either A.) enter in the number for your class (if you know it) or B.) run a Class Search or add from My Planner*.

3. If it's A, the search will bring up your number's assigned class, and you only have to click the green button that reads, "Next." If it's B, then you will have to search through the system database. Once you've found the right class, you can hit the green button that reads, "Select Class", which will lead you to another screen and prompt, this time with a second green button that reads, "Next."

4. It should be noted that while your classes are in your Course Cart, safe and sound, this does not mean you are enrolled in the class. The Course Cart **does not automatically enroll**, either. You will have to revisit the Course Cart, on **your enrollment date**, and click Enroll at your scheduled time.

5. Think of it as online shopping. You can browse along, place the items in your basket, but you can't check out until the cashier is ready. This cashier happens to be your enrollment date.
