Abstract (if needed)[replace]

[According to the *Publication Manual of the American Psychological Association* (APA), an abstract is a "brief, comprehensive summary of the contents of the article; it allows readers to survey the contents of an article quickly and, like a title, it enables persons interested in the document to retrieve it from abstracting and indexing databases" (2010, p. 25). The first line of the abstract is not indented. An abstract may range from 150 to 250 words (APA, 2010). Because an abstract is not always required for student papers, adhere to your instructor's requirements.]
